Highly organized, motivated and diligent. Experienced in using project management tools like Git, Trello. Enthusiastic about contributing to team success through hard work, attention to detail and excellent communication skills.

INDUSTRY EXPERIENCE (FREELANCE)

REDEVELOPMENT OF THE PROGNOSIS TOOL OF A BETTING PLATFORM [\[Github\]](#)

A [betting platform](#) owned by [Web International Services](#) required some re-engineering of its backend application. The issue was with the machine learning algorithm being improperly implemented - the betting odds being calculated were not as expected. I corrected the necessary errors in the source code written in R, and the application was giving out the expected results again.

DIAGNOSIS AND REDESIGN OF A SLOW RUNNING SERVER APPLICATION [\[Github\]](#)

A clinical monitoring application, owned by AstraZeneca and developed using R, takes a long time to start. The task requirement to optimize the loading time of the application. I reverse-engineered the source code and redesigned the data storage system, keeping the interface intact. The application became about 5 times faster.
