Recruiting Department

Octamile

Dear Hiring Manager,

Thank you for the opportunity to apply for the Backend Engineer role at your company. After reviewing the job description, it is clear that you are looking for a candidate that has a good background working with API integration and services, and does assigned tasks in a timely manner. Given these core requirements, I am certain that I have the necessary skills to do the job adeptly and perform the required responsibilities.

I am a detail-oriented and naturally curious backend engineer, who has had more than 3 years of experience developing web services in Golang, centered on API integration. Having also worked on the server-side in a couple of other programming environments, I can vouch for my versatility in dealing with new integrations. I have a good understanding of Linux system administration, too.

My industry experience has spanned working on server-side applications for sport betting platforms, clinical monitoring systems, and a couple of others. I believe I will leverage these experiences and abilities acquired in supporting the goals of Octamile in simplifying access to insurance across Africa.

In both my professional and personal life, I have been consistently praised as diligent by my supervisors and peers. I am usually concerned about delivering projects before deadlines. I also adapt quickly to fast-paced working environments. Whether working on professional or personal projects, I apply proven analytical, critical thinking and teamwork skills, which I hope to leverage into the Backend Engineer role at Octamile.

After reviewing my resume, I hope you will agree that I am the type of competent candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit Octamile. Please contact me at 234-704-998-6998 or via email at abdulmateen.a.q@gmail.com to arrange for a convenient meeting time, if needed.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Abdul-Mateen Qamardeen
